

NOTICE TO MEMBERS

Dear Members,

Please be informed that the Club will be carrying out EV charger installation works at Level 8, commencing from 26 March 2026. The project is expected to be completed within two (2) weeks.

During 26–28 March 2026, hacking works will be carried out and may generate dust. Members are therefore advised to avoid parking at Level 8 during this period.

Throughout the installation period, four (4) parking bays will be temporarily closed to facilitate the works. However, access and passage at Level 8 will remain open, and members may continue to use the area as usual.

Thank You.

The Management
